

FOR IMMEDIATE RELEASE

**ADAPTIVE CLINICAL SYSTEMS ENTERS INTO DATA INTEROPERABILITY
PARTNERSHIP WITH TRIAL INTERACTIVE**

SARASOTA, FL, SEPTEMBER 16, 2024 - Adaptive Clinical Systems is pleased to announce that it has entered a partnership on data interoperability with TransPerfect's Trial Interactive. Clinical sponsors and CROs leveraging the Trial Interactive eClinical platform benefit from an additional layer of interoperability via streamlined data aggregation from disparate sources.

The Adaptive eClinical Bus[®] and DataVIEW[®] solutions support augmentations that expand real-time patient monitoring by connecting more data sources, while offering additional options for reporting and visualization. Sponsors leveraging a diverse infrastructure of eClinical technologies from different providers and platforms gain a simplified means to securely and seamlessly exchange data and documents between systems.

Sponsors who take advantage of this partnership also gain access to both the Adaptive Clinical and Trial Interactive platform ecosystems. This interconnectivity creates a powerful extensibility augmentation of Trial Interactive's seamless suite of solutions (including eTMF, CTMS, Study Start-Up, eISF, LMS, eFeasibility, and more) through a

full library of third-party interconnects. Sponsors can easily exchange data with any tool to enable holistic data management. For study teams planning implementations involving systems from various providers, this partnership will reduce and/or eliminate the need for custom API integrations, helping to improve timelines and reduce cost (especially when starting a new study).

“Sponsors need the flexibility to enable the eClinical infrastructure that best meets their requirements,” said Michael Smyth, Division President, TransPerfect Life Sciences.

“This partnership offers study teams and IT even more options for a seamless and right-fit setup.”

“As our industry trends towards more complex studies, even small to mid-size sponsors find themselves in a multi-CRO environment with disparate systems in need of interoperability,” said Sina Adibi, CEO and President, Adaptive Clinical Systems. “This partnership enables sponsors of any size to benefit from a robust interoperable eClinical ecosystem.”

About Trial Interactive

TransPerfect’s Trial Interactive is an industry leader in practical e-clinical innovation that simplifies and automates clinical processes for sponsors, CROs, and sites around the world. The 21 CFR part 11 compliant and HITRUST certified platform delivers an author-to-archive collaboration experience with solutions for clinical document management, site selection, site activation, e-learning, compliance training, quality, and more with seamless solution interoperability and indexing to the eTMF. Trial Interactive

is consistently selected by clinical professionals for providing the most comprehensive yet intuitive experience with the most complete offering of technology and expert TMF services. Trial Interactive helps study teams streamline their operations by cutting unnecessary expenses, expediting timelines, reducing compliance risks, and improving operational excellence.
